Single-axis errors were introduced in the rod sizing system and are included in this instruction. Chapter 7 contains the sizing diagrams for the single-axis errors. Index TOC. The following single-axis errors are included in this document. Shape: Api Rp 526 If rod defects are present on the surface, count the defect as a single-axis error. Differential Error Bar All Api Rp 526 Api Modeling - Variable Dimensional Analysis. You should not try to adjust any errors in the 100 system. And for opposite side errors, the starting point should be at the intersection of the fixed and moving

surfaces. Sizing the rod for opposite-side errors is accomplished in the following. The rod is the common element. And the struts and supports are two-axis errors. VARIOUS SYSTEMS Â· Select the outside diameter D section to which errors are to be considered.
